

The machine calibrates each single link to the exact same dimensions. The links are loaded into vibrating hopper which see to selecting each link and loading it on to the position shaft from which the link is discharge to the calibrating hammers. From there it is sent into a waiting container so as to facilitate loading to the next machine

**Technical features**

Max. production speed
Wire Ø

180 links/min
0.25 to 1.20 mm

Technical data

Voltage (single phase)
Power
Compressed air

230 V 50/60 Hz
0.5 kW
30 l/min (filtered) at 4 bar

Dimensions

Packing

45 x 32 x 80 (h)cm - 50 kg
56 x 46 x 96 (h) cm - 80 kg
