

Machine for the production of rope chain links. The unit is fed with wire on a reel. The wire can be solid or hollow (tube with a metal core). The process consists in cutting to size, forming the link and discharging it into a waiting container

**Technical features**

Max. production speed  
Wire Ø

220 links/min  
0.25 - 1.00 mm

**Technical data**

Voltage (single phase)  
Power  
Compressed air

230 V 50/60 Hz  
0.50 kW  
100 l/min (filtered) at 6 bar

**Dimensions**

Packing

55 x 50 x 132 (h)cm - 121 kg  
61 x 176 x 64 (h) cm - 176 kg
