Technical Machinery Notes

ROPE/EUROPE LINK MAKING & CALIBRATION MACHINE - 245

Machine for the production of Rope & Europe chain links. The unit is fed with wire on a reel. The wire can be solid or hollow (tube with a metal core). The process consists in cutting the wire to the exact size, forming the link, hammering it for perfect calibration and brilliance and then discharging it into a waiting container, ready for use in next step.

The machine is controlled via an onboard PLC interfaced with touchscreen controller.

Ease of use is guaranteed by fixed mechanical setting for all parts requiring adjustment. The whole work process is aligned for operator ease.

Brushless motors guarantee speed and precision.

## Technical features

Max. production speed

150 links/min

Wire Ø

0.25 - 1.20 mm

## Technical data

Voltage (single phase)

230 V 50/60 Hz

Power

1.30 kW

Compressed air

1 l/min (filtered) at 7 bar

*Dimensions*

90 x 45 x 152(h) cm – 80 kg

*Packing*

180 x 60 x 55 (h) cm 160 kg
