PROGRAMMABLE TWISTING MACHINE

The FG2 Chain Twisting Machine by Ciemmeo is a fully programmable system for twisting, stretching, and compressing jewellery chains. It allows endless creative possibilities, producing both traditional and fantasy designs with consistent precision.

This chain twisting machine operates without mechanical adjustments — no cams, no belts, and no manual settings. All production parameters can be entered directly through the keyboard or recalled from the machine's memory bank, allowing fast setup and repeatability.
