PROGRAMMABLE TWISTING MACHINE

The FG5 Programmable Chain Twisting Machine by Ciemmeo is a fully programmable unit designed for twisting, stretching, and compressing chains with absolute precision. No cams, no belts, and no manual adjustments are required — just input the parameters or recall a stored program, and production begins instantly.

This programmable chain twisting machine allows users to create both traditional and fantasy chains by combining twisting, compressing, and stretching functions either individually or simultaneously. All production data can be stored in the internal memory or on a connected PC for unlimited program storage.
