AUTOMATIC HAMMERING PRESS

The PS2B Jewellery Hammering Press by Ciemmeo is a fully automatic 30-ton press designed for hammering compacted and non-compacted chains. It combines silent operation, high precision, and long-lasting stability to achieve perfect surface finishes and consistent thickness.

This jewellery hammering press is based on a knee-joint (toggle) mechanism that delivers total and controlled power at every stroke. The design minimises internal stress and wear while maintaining micrometric accuracy throughout the machine's lifespan.

MAIN FEATURES

- 30 ton hammering power
- Hammers link & compacted chains
- Rapid stamping block changeover
- Knee joint movement
- Precision micrometric stroke control
