SN4

CHAIN LIMBERING MACHINE

The SN4 Chain Limbering Machine by Ciemmeo is an automatic unit designed for limbering flat hammered chains. It corrects natural twisting produced during hammering and restores perfect chain flexibility and alignment.

This chain limbering machine uses a twin set of parallel-controlled motors to draw and feed the chain through the limbering section. The section is composed of three pairs of rollers arranged along a twisted plane, which forces the chain to twist slightly during the process, eliminating residual stress and unwanted spiralling.

MAIN FEATURES

- Limbers flat hammered chains on fixed plane
- Compensates spiralling
- Wire Ø 0.18 – 2.50 mm
- Pushing and pulling motors

TECHNICAL DATA

Production speed	5 m/min.
Chain wire Ø	0.18 - 2.50 mm
Voltage	230 V 50/60 Hz
Power	0.80 kW
Dimensions	100 x 42 x 56 (h) cm – 52 kg
Packing	112 x 51 x 70 (h) cm – 82 kg

Note: The above data, features and characteristics are not binding. Ciemmeo s.r.l. retains the right to vary them at any time without prior notice.
